COVID-19: THIS UV LIGHT DISINFECTION ROBOT CAN SANITISE ENTIRE ROOM IN JUST 4 MINUTES
May 13, 2020, 06:06PM ISTSource: ANI

To support the COVID-19 fight, an engineering company in Mangaluru has developed a UV light disinfection robot. The remote-controlled device is capable of disinfecting an area swiftly. It has been deployed at Tejasvini Hospital in Mangaluru. UV radiations emitted through the device can clean a surface in just 4 seconds. Device will be most helpful for frontline workers engaged in COVID fight.
