Imitation oil and grease factory raided, many drums found

Madanganj-Kishangarh (Ajmer).

On Tuesday, police raided the factory to make oil and grease used in vehicles and machines. Police have found a large number of drums from Greece and Oil here. The police have seized the factory. It is desperately searching for its owner and the gang involved.

Deputy Superintendent of Police Partha Sharma said that Anil Petro Lube Pvt. Ltd., which manufactures oil and grease without licenses and permits. Ltd. Large quantities of counterfeit oil, grease and equipment used to make them were seized from the oil factory. A case has been registered against the factory operator Sunil Gangwal. Sharma said that the police team reached Khoda Ganesh Tirahe while patrolling. It was reported here that oil is made illegally in the Anil Petro Lube Private Limited oil factory located at some distance from the main road and adjacent to Dhani Purohitan. There are also a large number of these filled drums. On investigation, the police team, including the deputy, reached the factory, but before this the factory owner and the employees left. The police found a lot of drum oil in the factory. Many of them are empty and many are filled. Oil-like material was found to be full in the drums, while grease-like material was also found in some drums.

Team called for investigation

Deputy Sharma said that SP Kunwar Rashtradeep was informed about this and asked to send the FSL team to Ajmer for investigation. On this, Sanjay and Dr. Rekha Jain sent the team to Kishangarh. Castrol Oil representative Hemant Bardia was called on mobile. Members of the team from Ajmer confirmed that the factory has a recycling plant (recycled) and is in its current state. The team also found a variety of furnace plants and tanks in the factory. The pipes made from these were checked through a number of pipes in the ground and storage in the tank was carried out through various processes. On the basis of the team's experience and experience, the liquid filled in tanks and some drums in the form of oil kept for sale.

Recycled oil is bad

During interrogation, the police came to know that various types of counterfeit oil and grease are made by purchasing West Oil and putting it in the factory at a recycling plant. Here black oil refined, used power oil, refined power oil, black Brunt oil which is used to make grease. Chassis make white and black grease.
