Foreword

On behalf of ASPA we feel privileged to present this report, **"The State of Counterfeiting in India 2021"**. This report has been prepared to statistically represent counterfeit news items in print & other media, to help the reader in understanding counterfeiting trends in India better.

Counterfeiting is a global menace and no economy in the world has remained unaffected by this menace. The Indian citizens lives, and economy has also been affected and disturbingly counterfeiting incidents have been increasing in the last three year. Although, measuring the economic impact of counterfeiting is methodologically challenging, informed studies estimate that trade in counterfeit goods is now 3.3 percent of world trade and increasing. It is well known and documented that counterfeit goods can cause risks to consumers' health and well-being, distort competition, damage legitimate producers' interests and their brand names, undermine employment and reduce tax income.

A big challenge is that Counterfeiters are becoming smarter, better funded, and organized. The onus on all impacted parties to stay one step ahead of them is even more critical. The growth of e-commerce, the globalization of markets has made the fight against counterfeiting even more challenging.

The industry and the regulating authorities need to promote authentication solutions and review their strategy to fight counterfeiting by following good business practices as prescribed in ISO 12931, and ISO 28000 that is in the pipeline.

At ASPA we believe that we can contribute in a small way in fighting this menace by bringing this issue into the limelight at all Industry and government forums. Our members are also working with brand owners and Government bodies in providing technologically advanced solutions in fighting this menace.

We are confident that with the support of all affected parties, we can help in curbing the impact of counterfeiting.

This report is part of our initiative in building awareness on the Economic and Societal impact of Counterfeiting and enable all stakeholders give a higher priority to combating this menace, often called as the **"Crime of 21st Century"**.

We hope you find this report useful.
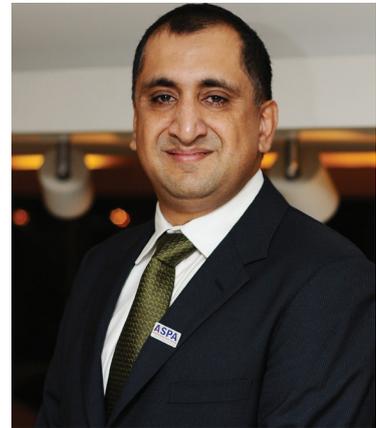

Nakul Pasricha, President

1. Executive Summary

About the Report

The report is the second in its series prepared by ASPA to statistically present print and other media reports pertaining to Counterfeiting, to help stakeholders to understand the nature of counterfeiting activity in India and the industries, and regions most affected by counterfeiting.

Purpose of the Report

There are various factors which contribute to the increase in counterfeiting. The foremost factor is the lack of awareness about the severity and impact of this menace. This report is designed to provide insight to all stakeholders (including brand owners and government authorities) to deepen their understanding of counterfeiting activities and help policymakers to formulate stronger strategies and policies to fight this menace.

Methodology

This report has been made by methodically monitoring and collating news from leading English and vernacular print and digital media across the country.

The media list includes but not limited to print and digital media publications like Amar Ujala, AAJ Tak, ANI, AV News, Avadhkiaawaz, Bhopal Samachar, Dainik Jagran, Deccan Chronicle, Dainik Bhaskar, Dainik Reporter, Deccan Herald, Dinamalar, Financial Express, Glibs, Hari Bhoomi, Hindustan, Indian Express, Kalinga TV, Mint, Nai Dunia, Nav Bharat Times, Punjab Kesari, Prabha Sakshi, News Wing, Rajasthan Patrika, Swadesh, Sanjeevni, Swatantra Prabhat, TV9, Pioneer, The Times of India, Business Standard, Raftaar, The Hans India, Siasat, Pragativadi, The Hindu Business Line, The Tribune, Mathrubhumi, Khas Khabar, Zee Business etc. & various vernacular Media.

The database for this report is available at the ASPA established Counterfeit News Repository. For more, visit https://www.counterfeitrepository.com

This portal is a single stop source for all counterfeiting incidents reported in India. The information shared at the portal is all statistical and has been compiled from third-party sources, which we believe are reliable.

Key highlights of this report

- Second edition of counterfeit incidents reported in India

- Trends in the number of incidents reported by media in the last three years

- Top sectors and products most vulnerable to counterfeit attack

- Counterfeit Index Ranking – Position of States (regarding the highest number of cases reported)

- Glimpse of monthly top counterfeit news reported in the year 2020

The legal framework

For the report, the term "counterfeiting" is used in its broadest sense and encompasses any manufacturing of a product that so closely imitates the appearance of the product of another that it misleads a consumer it is the product of another. Hence, it may include trademark infringing goods, as well as copyright infringements. The concept also includes copying of packaging, labelling, and any other significant features of the product.

Note:

The period used in the report is of January 2018 to December 2020.

2. The key takeaway from 2020

2.1   Counterfeiting on the rise

India is not new to counterfeiting. It costs the Indian economy INR 1 trillion every year. In fact, one in three Indian adults have been victims of fake products from one or the other e-commerce websites, making online counterfeiting the fastest growing crime. Counterfeiting activities take place round the clock and impact all major industries and sectors to some extent. The US Federal Bureau of Investigation (FBI) has named counterfeiting 'The Crime of the 21st century'.

Our data shows an increase in counterfeiting incidents from where they were in 2019 and 2018. The number of incidents being reported by media have also surged. In the last three years, we've analyzed an average increase of counterfeit incident reports by 20 percent in the last three years. In 2020, 666 cases were reported with an increase of 96 cases comparing to 2019 (570).

With businesses being attacked more often and on a larger scale than ever before, there is a direct impact on consumer trust. Quality, transparency, and traceability in the supply chain have become prime factors for consumers. During 2010-2017, there were almost 29 recall events in India across the automobile, drugs, and food sectors. In 2020 alone, the Indian auto industry recalled a total of 3,37,082 vehicles (Source: The Hindu Business Line).

> **Counterfeit incident are increasing by 20% average in between 2018-20**

## 2.2   Counterfeiting is becoming rampant: a 24x7 activity

Counterfeiters are becoming smarter and taking their work seriously. Our data shows a regular pattern – counterfeit activities happen across the year and are not limited to festive or any specific seasons. This means that counterfeiting is no more a causal act for the perpetrators, and they look for every opportunity they can monetize. For instance, even during the COVID-19 lockdown, more than 30 incidents were reported in India during March-April 2020 that involved making sub-standard PPE kits and related items. According to the Delhi Police data, 155 people were arrested in 147 cases under the Excise Act and 18,556 bottles of liquor was recovered in the first two weeks of April during the ongoing lockdown.

This only brings to light how brands need to wake up to the fact that counterfeiters are constantly evolving with the times, exploring digital mediums, and targeting any product or sector which is easy to breach. They have a ready game plan.

> " During the COVID-19 lockdown (March-April 2020), more than 30 incidents of sub-standard PPE kits and related items were reported "

Counterfeit incidents reported on monthly basis

2.3 Counterfeiters not limited to category – Targeting both quality and quantity

In recent years, we have noticed an uptick in 'unsophisticated' frauds. Professional fraudsters have been busy adapting to new methods. They are now using the latest manufacturing and printing technologies to duplicate finishes, print boxes, labels, codes, and packaging that mimics genuine products perfectly.

Fakes are almost undetectable to an average consumer. One such example is of banknotes. A recent seizure revealed fake banknotes of extreme high quality. In another case, a person began counterfeiting Indian banknotes after learning it from YouTube. Similarly, police lately seized more than 2700 liters of fake diesel along with 10,000 liters of petroleum products. The perpetrators were running their unit for the last five years and supplying fake diesel in rural areas (you can check the video here: https://youtu.be/IbEm8hXzbQQ).

Our data interprets that counterfeiters are targeting both quantity and quality and the highest proportion of cases fall under 'Easy' or 'Medium', with only an exceedingly small percentage of cases classified as 'Hard'. In the wake of this, we need stringent systems in place to handle sophisticated attacks from criminal gangs, as well as high volume of attacks from rookie fraudsters.

2.4 Most vulnerable industries and products – Need special attention

The graphics below show the sectors that have been affected the most. Alcohol, Tobacco, FMCG Packaged Goods, Currency & Pharmaceuticals constitutes more than 84 percent of counterfeit cases. During the COVID-19 lockdown, there was a spike in crimes related to illicit liquor and pharmaceutical products especially PPE kits and sanitizers, etc. Fraudsters have some ingenious methods of producing and smuggling liquor. For example, many people started producing liquor from hand sanitizers. According to sources, over 250 people died in India because of hooch tragedies in the year 2019.

Modus Operandi for Liquor
a) Procure spirit in petrol and diesel tank – wrapper and bottles, mix color in spirits, bottle filling – supply in market.

b) Procurement of sanitizer/ ethynyl alcohol – wrapper and bottles, mix color in spirits, bottle filling – supply in market.

" Over 250 people died in India because of hooch tragedies in the year 2019 "

2.5 Types of fraud – Counterfeiting vs. Smuggling

In the year 2020, analyzing a total of 666 cases from the repository database, we found that 82 percent of the cases were of counterfeiting, while 12 percent were smuggling and 6 percent fell in other categories including adulteration. Alcohol and Tobacco are the sectors that showed both counterfeiting and smuggling cases. In the counterfeiting category, 25 percent of cases found were related to alcohol, followed by currency (19 percent), pharmaceutical (16 percent), FMCG (16 percent), and tobacco (8 percent). In smuggling cases (specifically related to products) 92 percent of cases found were related to tobacco.

If you are scaling into a new sector, Tobacco faces the highest jump in 2020 over 2019 and 2018. According to a query response raised in the Lok Sabha, Indian authorities seized illegally imported cigarettes worth INR 1,772 crore between April 2020 and February 2021. That compares with seizures worth INR 187.6 crore in the previous financial year.

Fraud categories 2020 (% of total)

*Data is for period 01-January-2018 to 31-December-2020

- Counterfeiting 82%
- Smuggling 12%
- Others 6%

- Criminals selling sub-standard masks, Patrika, May 6, 2020
- Over 70 held, fake goods worth Rs 1.7 crore seized, Business Standard, May 6, 2020
- Bengaluru: CCB conducts 51 raids during lockdown period, seizes fake masks, sanitizers, TOI, May 13, 2020
- Selling fake sanitizers in the name of the company, police raided, Zee Business, June 19, 2020

Odisha
- Fake hand sanitizers seized in Bhubaneswar, two held, Kalinga, March 30, 2020
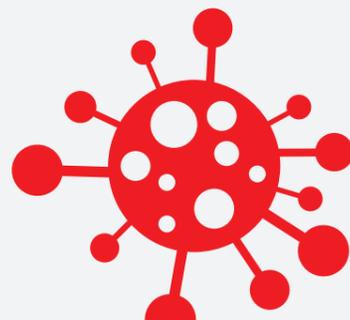

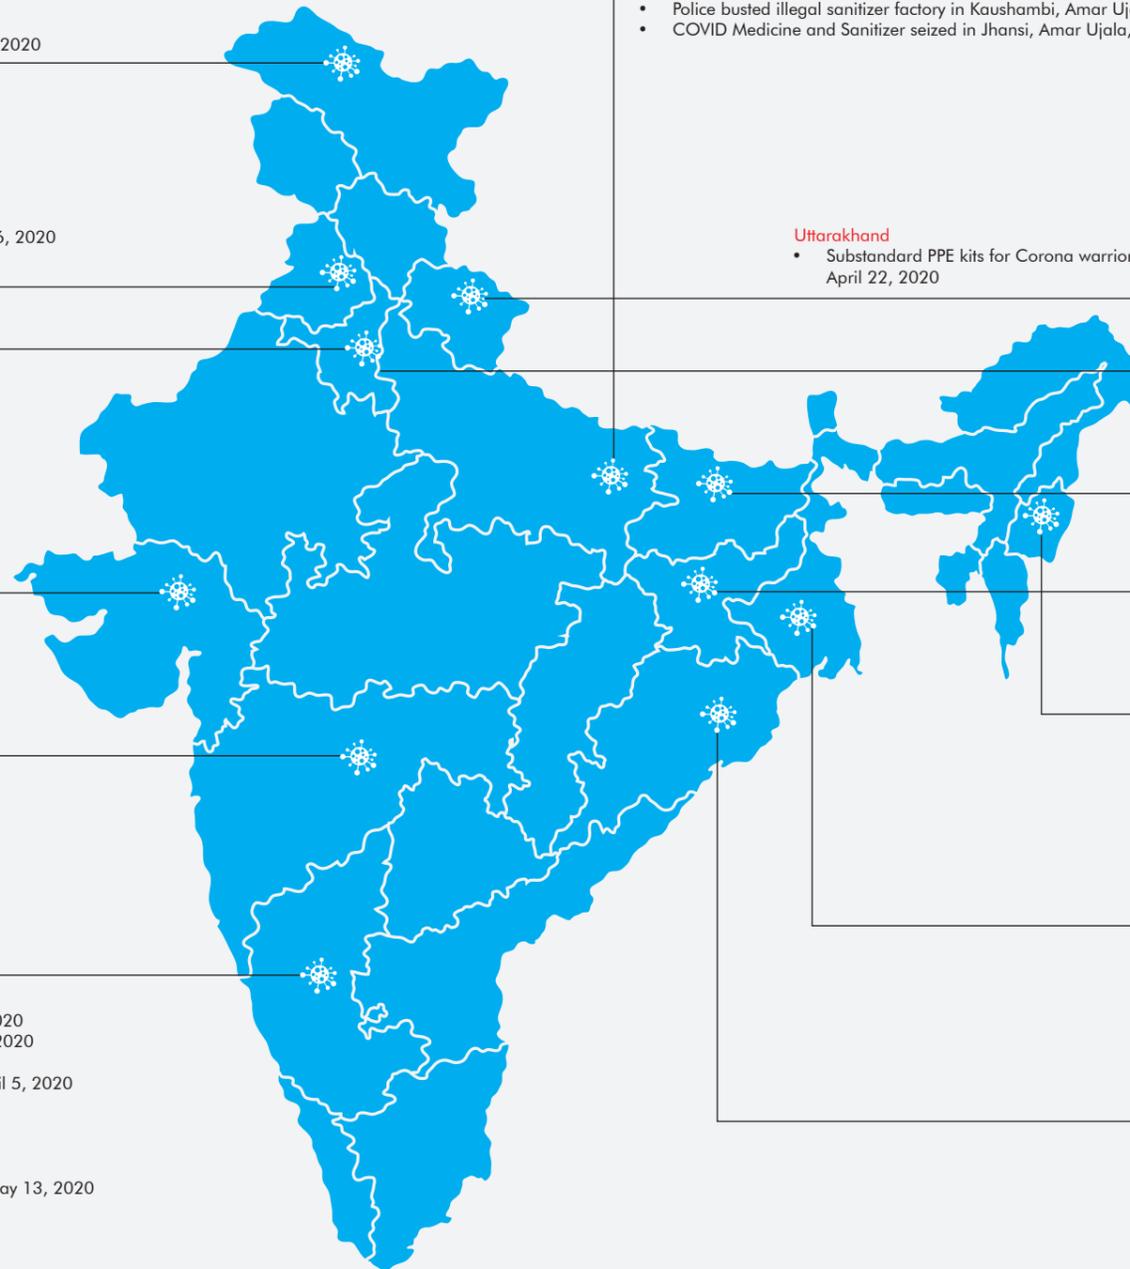

2.9 Key reasons for the rise

a. No specific legislation to address counterfeiting:
India has a robust legal framework for combating counterfeiting and piracy, but a lot still needs to be done to simplify the enforcement procedure (as there is no specific legislation to address it). Thankfully, statutory remedies – civil, criminal, and administrative – can be found in various statutes, including the Trademarks Act 1999, the Copyright Act 1957, the Patents Act 1970, the Designs Act, the Geographical Indications Act 1999, the Drugs and Cosmetics Act 1940, the Food Safety and Standards Act 2006, the Consumers Protection Act 1986, the Penal Code, the Information Technology Act 2000, and the Customs Act, 1962.

b. Challenges in enforcement and execution:
Although a small number of India's state authorities, including Maharashtra and Telangana, continue to operate dedicated crime enforcement units, other States have not followed suit or face organizational challenges. Further, slow execution encourages the criminals to continue their fraudster activities.

Table: Court Disposal of Economic Offences (Crime)

S.No.	Heading	2018	2019
1.	Total trial cases including previous	8855	8871
2.	Conviction Rate	33%	36.2%
3.	Pendency Percentage	95%	95%

Table: Disposal of people arrested under Economic Offences (Crime) – Counterfeiting, Source: National Crime Report Bureau 2019

S. No.	Heading	2018	2019
1.	People arrested	2003	1732
2.	People charge-sheeted	1569	1400
3.	People convicted	234	248
4.	People discharged	28	31
5.	People acquitted	522	396

"Gwalior: In a recent case, the accused was caught making fake ghee ten years ago (2010). In 2017, the Special Judicial Magistrate had sentenced him to six months, but he was released on bail. The order of conviction was challenged in the appeal. Now, almost after ten years, the Additional Sessions Court served him a sentence of six months".

In many cases, these criminals re-start their activities even after getting parole.

Source: https://www.naidunia.com/madhya-pradesh/gwalior-gwalior-court-news-ten-years-ago-he-was-caught-making-fake-ghee-after-three-years-of-punishment-he-was-imprisoned-6694277

c. Non-adoption of technologies leading to identification:

Our data shows that in many cases, criminals are acquitted in absence of evidence. As counterfeiters are getting smarter, they can imitate the packaging to a great extent. Many times, in absence of anti-counterfeiting technologies, it becomes difficult for the Police and the Enforcement & Investigative officers to identify the difference between genuine vs. fake, which further results in weak FIR and loopholes in evidence.

d. Need clarity on regulations:

Pharmaceuticals, Tobacco and Alcohol: The brand owners need to be more aware. Further, it has been often noticed that the adoption of authentication and traceability solutions is exceptionally low in absence of clear regulations. For example, in industries like Pharmaceuticals, Tobacco, and Food, we are yet to implement global authentication and traceability practices and regulations. Plus, there is no mandatory regulation for domestic drugs. We already have serialization for pharma and food exports, and it is important to have consistency in the domestic ecosystem.

Price: Complimentary hard copies for Government officials / Brand owners only

All reports available on request; contact Chander S Jeena: info@aspaglobal.com

As a nation, we now face a serious threat and challenge from the illicit economy.

Illegal activities slowed industrial growth, thus affecting producers, and stunted revenue, hitting job growth. Consumers were the ultimate victims of counterfeiting, smuggling, and piracy as they paid excessive prices for substandard products that also increased exposure to health and safety risks.

To fight the crime of the 21st Century, the involvement of all stakeholders is important and therefore, we must maintain all that we can do to prevent it. A hand is what is required to come out of the and this is where we prove our responsibility.

JOIN US IN FIGHT AGAINST FAKES!

ASPA

Authentication Solution Providers' Association

Diverse technologies, common goal.

Formed in 1998, a non-profit organization, Authentication Solution Providers' Association (ASPA) has a rich heritage of 21 years and is recognized globally as a regulated and ethical organization. It is working to build up a world class environment that supports the advancement of authentication ecosystems in India against the counterfeiting activity and illicit economy. ASPA works on four key areas a) Awareness b) Advocacy (Industry Partnership) c) Research & d) Innovation. Its member companies provide physical and digital authentication technologies, solutions & systems present across the globe. As an industry body of authentication solutions providers, it encourages its members to adopt best practices, standards, and advanced use of technology in providing cost-effective anti-counterfeiting solutions against counterfeiting.
